If you live in an ared heavily prone to lightning storms, it is recommended that you invest in power-line, telephone-line, RF cable and actuator / polarization surge protectors to protect your appliance system from possible damage

## 3. Product Concept and Features

- CMD-101BU building distributor is used to interlock with floor distributor (CMD-404FU) and is developed for interlocking Modum systme monitor with lobby and guard.
- CMD-101BU is limited to the following devices that can be connected to interlock Lobby phone: Export-oriented type LOBBY (Gate View, Multi panel) Guard phone: Gate view guard phone (CDS-4GS) & Audio gate guard phone(CDS-2AG) Floor distributor: Modum distributor (CMD-404FU) (Required) Video phone: The video phone for 4-wire way Modum system(CMV-43A) Porter: AP-3SG(PORTER only) CCTV selector: CMD-104V, Adapter: RF-2A
- CMD-101BU Notes on wiring (It doesn't guarantee the quality of product for connection if you do not keep the following)
  - CMD-101BU building distributor can be installed up to six in one building.
  - It wire the CCTV selector, CMD-104VU, to "CMD-104VU(IN)" in the CMD-101BU.
  - Wire with "CMD-104VU(IN) OF NEXT CMD-101BU in "CMD-104VU(OUT)" of CMD-

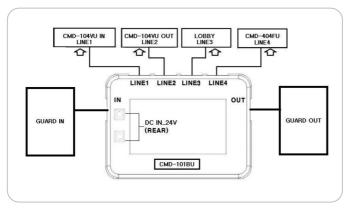

#### 101BU.

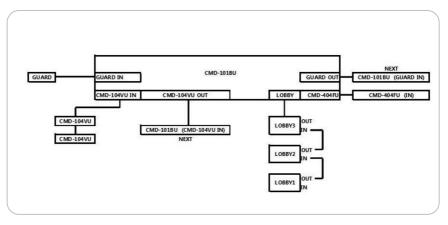

- It wire export-oriented UTP type Lobby (Gate View, Multi panel) to "LOBBY" in the CMD-101BU.
- It wire modum floor distributor (CMD-404FU)(Required) to "CMD-404FU" in the CMD-101BU.
- "GUARD IN" in the CMD-101BU
  Guard phone: Gate View guard phone (CDS-4GS) and Audio Gate guard phone
  (CDS-2AG) Porter: It wire AP-3SG(PORTER only). The porter must wire with guard phone & use it.
- Wire with "GUARD IN" OF NEXT building distributor CMD-101BU in "GUARD OUT" of CMD-101BU.
- Floor distributor (CMD-404FU) by 40ea must be used within a maximum distance 300m from main entrance / CCTV .
- The distant from floor distributor (CMD-404FU) to Modum System video phone is within 30m.

- Separate power must be connected to CMD-101BU.(DC24V / 1A or higher)
- Each CMD-101BU must be installed to be supplied with the power (DC24V/1A) basically

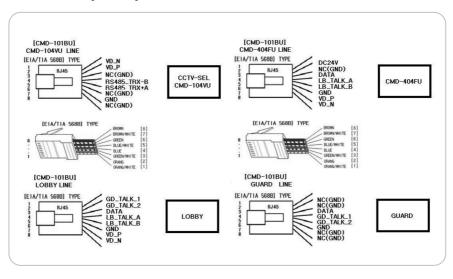

## 4. The wiring

Main entrance / CCTV → Building distributor(CMD-101BU) → CMD-404FU
 (1<sup>ST</sup> FLOOR) → CMD-404FU(2<sup>ND</sup> FLOOR) → ... → MODUM VIDEO PHONE

## : UTP CABLE [CAT.5e] - MAX 300m

## 5. Set the mode of building distributor

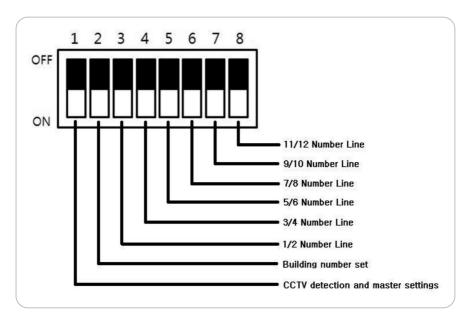

- Using up the back of the product, DIP switch (8 channels) when you set the mode of building distributor.
- The function of each switch
  - NO. **1** CCTV detection and master settings
  - A. If even one CCTV is installed through CCTV selector(CMD-104VU), Switching on no1 can provide information to video phone from CCTV.
  - B. If it is shared in the unit of each of the two different building distributors with external CCTV, only one building distributor should be set as the master with switching number 1 on, the other should be placed by 1 switch off.
    - It is not possible to be set as the master at the same time two building distributors.
  - NO. 2 Building number set
  - A. First, install Lobby Panel, set the building Number

B. When Modum system is installed in the first building with turning on NO2 switch, the building number of building distributor is set as common entrance number if you call monitor and guard station from lobby phone. After this, you should put back twice.

We use it when installing several sets of building distributor in one building.

- NO. **3** If the building distributor is extended to several sets in a building, 1/2 number line has been set up when the Switch 3 is made on.
- NO. 4 If the building distributor is extended to several sets in a building, 3/4 number line has been set up when the Switch 4 is made on.
- NO. **1** If the building distributor is extended to several sets in a building, 5/6 number line has been set up when the Switch 5 is made on.

- NO. **6** If the building distributor is extended to several sets in a building, 7/8 number line has been set up when the Switch 6 is made on.
- NO. If the building distributor is extended to several sets in a building, 9/10number line has been set up when the Switch 7 is made on.
- NO. **3** If the building distributor is extended to several sets in a building, 11/12 number line has been set up when the Switch 8 is made on.
- Ex) Number 1 ~ 4 Line: Switch 3, 4 ON / Switch 5 ~ 8 OFF

# 6. Specification

| Spec             | CMD-101BU [Building distributor] (COMMAX MODUM DEVICE BUILDING DISTRIBUTOR) |
|------------------|---|
| Transmission way | Main entrance 8 lines (polarity), Modum system floor                        |
|                  | distributor(CMD-404FU) 6 lines(polarity)                                    |
|                  | CCTV selector(CMD-104VU) 5 lines (polarity),                                |
|                  | Guard 4 lines (polarity)  |
|                  | (RJ45 CAT5e Patch Cable)  |
| Voltage          | DC 24V / 1A (MAX)   |
| Wiring Sequence  | 1. Modum system building distributor (CMD-101BU) → Floor distributor        |
|                  | Wiring Sequence(CMD-404FU) IN (Input)                                       |
|                  | 2. Main entrance/Guard/CMD-104VU → Modum system building distributor        |
|                  | (CMD-101BU)   |
| Wiring distance  | From main entrance/CCTV to monitor is 300m. The distance from each          |
|                  | floor distributor to monitor is limited by 30m.                             |
|                  | Maximum call distance from guard/porter to monitor is 1Km                   |
